

Storage Hangar Business Jet Center

Dallas, TX

Design and construction of a 38,500 SF Storage Hangar with a 7,800 SF Lean-to. The Lean-to includes four individual office/shop suites, a hangar storage area, and a common entry space with restrooms and building janitor and IT spaces. Translucent panels span across the hangar door and along the back wall of the hangar allowing natural light into the hangar. The projects also includes associated parking and ramp paving.

Project Type:
Storage Hangar

Location:
Dallas, TX

Services:
Architecture / General Contracting

Project Delivery:
Design/Build

Completion Date:
2019
